SKILLS

- Programming Languages: Python, C, C++, java
- Database Management: MySQL Web
- Development: HTML, CSS Data
- Analysis Tools: Pandas, NumPy (if applicable)
- Soft Skills: Problem-solving, Analytical thinking, Team collaboration, Time management

EDUCATION

B.Tech Artificial Intelligence and Data Science

RP SARATHY INSTITUTE OF TECNOLOGY
2023-2027

12th grade passed with 80.83%

Senthil Matric Hr. Sec. School | 2023

10th grade - all pass

Senthil Matric Hr. Sec. School | 2021

LANGUAGES

English

Tamil

PROFILE

Full-Stack Developer currently pursuing a B.Tech in AI & Data Science. Technically proficient in building end-to-end web applications using Python (Flask/Django), JavaScript, and SQL/NoSQL databases. Proven track record in developing secure user authentication systems, responsive UI/UX, and integrating AI-driven features like chatbots and real-time recognition into web environments. Adept at automating backend processes and optimizing database schemas for scalable, high-performance applications.

WORK EXPERIENCE

Fresher

1.Internet of Things (IoT):

- Designed and implemented IoT solutions using Arduino and Raspberry Pi.
- Worked with sensors and actuators to build smart systems, such as home automation and environmental monitoring. Integrated IoT devices with cloud platforms like AWS IoT or Google Firebase for real-time data storage and analysis.

2. Python Programming:

- Developed Python scripts to automate repetitive tasks and process IoT data.
- Utilized libraries like Pandas and NumPy for data handling and Matplotlib for visualization
- Worked on debugging and optimizing Python-based backend systems.

3. Web Development:

- Built responsive and user-friendly web interfaces using HTML, CSS, and JavaScript
- Developed backend APIs using Python frameworks such as Flask and Django.
- Designed database schemas and managed data storage using MySQL/MongoDB.

4.Blockchain

- BlockchainFundamentals Workshop–Gained hands-on experience in blockchain technology, smart contracts, and decentralized applications. Explored real-world applications in AI, data security, and financial systems.
Cryptography & Data Security
Blockchainfor AI & Data Science

PROJECTS

1. Real-Time Face Recognition for Attendance:

To develop a system that automates attendance tracking using real-time face recognition.

2. AI Chatbot: To create an AI chatbot capable of providing real-time responses

for customer support or general queries.

3. User Login Page: To build a secure and responsive user login system for

authentication and authorization.
